RUCDR

LAB DIRECTOR: Dr. Marvin A. Lessig**ADDRESS:** 145 Bevier Road Piscataway NJ 08854

Your results do not detect SARS-CoV-2 . A negative test means that the virus was not present in the sample you provided.

Your results suggest you were negative at the time of testing. Other illnesses such as the flu may present with similar symptoms as COVID-19.

Please refer to the FDA fact sheet if you have any questions:

FDA fact sheet for Patients: [Here \(https://www.fda.gov/media/137771/download\)](https://www.fda.gov/media/137771/download)

FDA fact sheet for Health Care Providers: [Here \(https://www.fda.gov/media/137774/download\)](https://www.fda.gov/media/137774/download)

This test has been authorized by the FDA under an Emergency Use Authorization for use by authorized laboratories. This test has not been FDA cleared or approved. This test has been authorized only for the detection of nucleic acid from SARS-CoV-2, not for any other viruses or pathogens. This test is only authorized for the duration of the declaration that circumstances exist justifying the authorization of emergency use of in vitro diagnostic tests for detection and/or diagnosis of COVID-19 under Section 564(b)(1) of the Act, 21 U.S.C. § 360bbb-3(b)(1), unless the authorization is terminated or revoked sooner.

What does this test check for? >

This is a PCR test that checks for genetic material from SARS-CoV-2. SARS-CoV-2 is the virus that causes coronavirus disease (also called COVID-19), a respiratory illness. Most people with COVID-19 have mild symptoms. You can pass the infection to others through coughing, sneezing, and exhaling. It is very important to stay home and limit your interaction with others in your household and in public.

Next Steps >

- Although your test results did not detect the virus, you should continue to monitor for symptoms for up to 14 days after your last possible exposure. Seek medical attention immediately if you develop severe symptoms, especially if you experience severe trouble breathing, continuous pain or pressure in your chest, feeling confused or having difficulty waking up, or blue-colored lips or face.
- It's important to follow isolation or quarantine precautions as recommended.
- If you believe you have symptoms of COVID-19 or that you have been exposed to the virus, you should consult your place of work for specific guidance about whether to stay home or continue working. You should adhere to recommendations set forth by your employer or the department of health, as they may differ from the CDC's guidelines.

How Can I Share My Results? >

If you would like to share your results with someone else such as your doctor or employer, click the print results button and save as a pdf.

CDC Safety Recommendation >

For guidance on what to do next, follow these recommendations from the [CDC](https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html)(<https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>).
